Education

FAST – National University of Computer and Emerging Sciences

Karachi, Pakistan

Bachelor of Science in Computer Science (CGPA: 3.31)

Aug. 2022 – June 2026

Technical Skills

Languages: C/C++, Python, JavaScript, TypeScript, SQL

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, NestJS, FastAPI, Angular, PyTorch

Databases & Caching: PostgreSQL, MongoDB, MySQL, Redis

Tools & Cloud Platforms: Git, Docker, Oracle Cloud Infrastructure (OCI), RESTful APIs, Linux

Experience

Myco.io 

Karachi, Pakistan

Junior Software Engineer [Full-time, Onsite]

March 2026 – Present

- Earned rapid promotion within 4 months for exceptional full-stack performance across flagship products.
- Drove production releases, built an internal CMS, and optimized database schemas to enhance system stability.
- Engineered predictive search with Redis caching and deployed an admin dashboard tracking key user engagement metrics.

10Pearls 

Remote

Software Engineer Intern [MERN Stack]

Sept. 2025 – Nov. 2025

- Collaborated in cross-functional Agile sprints to develop, test, and ship full-stack web applications using the MERN stack.
- Built responsive UI components and integrated robust backend services to improve system reliability and maintainability.

Trust Nexus 

Karachi, Pakistan

Backend Developer Intern

July 2025 – Sept. 2025

- Led backend development for enterprise systems including an internal HRMS and the NEXI Robot initiative using FastAPI and SQLAlchemy.
- Designed performant RESTful APIs and schema models while automating core data processing workflows.
- Configured deployment pipelines and deployed backend cloud microservices on Oracle Cloud Infrastructure.

Bulbul Arabic Speaking Classes 

Remote

AI & Web Development Intern

June 2025 – Aug. 2025

- Contributed to the initial website architecture, implementing core frontend user flows and responsive pages.
- Optimized conversational AI models to boost real-time response generation, inference speed, and overall system performance.

Projects

Muhafiz AI – Real-Time Violence & Theft Detection [FYP]  | *PyTorch, ViT, FastAPI, FL*

Jan. 2026

- Built an intelligent surveillance engine anticipating crime from live CCTV streams using EVA World Model (92.24% accuracy) with Vision Transformers and RSSM.
- Implemented decentralized Federated Learning across distributed edge nodes achieving 88% local model accuracy.
- Configured an automated real-time dispatch pipeline that broadcasts incident alerts via push notifications.

FashionAI Personal Style Assistant  | *Next.js, TypeScript, FastAPI, Tailwind CSS, Gemini API*

Dec. 2025

- Developed an AI outfit stylist with virtual wardrobe curation, budget planning, and a community swapping platform.
- Integrated diffusion models and Gemini APIs for visual aesthetic generation, winning the Marketplace Challenge.

Briefly – Meeting Intelligence Platform  | *Angular, Node.js, Express.js, MongoDB, TypeScript*

Oct. 2025

- Created a MEAN platform to capture discussions, auto-generate AI summaries, and extract task ownership workflows.
- Optimized asynchronous data pipelines to synchronize notes directly with project tracking boards.

Person Recognition via Gait Matching  | *Python, PyTorch, OpenCV, ResNet-101*

May 2025

- Engineered a biometric identity classification system delivering 96.65% accuracy across surveillance video feeds.
- Applied entropy-based feature selection over ResNet-101 embeddings to isolate distinctive movement traits.

Honors & Certifications

- **Winner – Remotebase AI Hackathon:** Designed and presented an AI-driven personal wardrobe stylist.
- **ICPC 2026 Asia Regional Qualifier:** Advanced from the Online Preliminary Contest to on-site Regional Finals.
- **Certifications:** Web Development [Coursera]; Git & GitHub, Python & AI, Hotstar Clone [DevTown].
